

- Aryl hydrocarbon receptor pathway
- response to nutrient
- cellular response to lipid
- blood vessel morphogenesis
- aldehyde metabolic process
- regulation of appetite
- Nuclear receptors in lipid metabolism and toxicity
- PPARA activates gene expression
- positive regulation of defense response
- multicellular organismal-level homeostasis
- xenobiotic transport
- NRF2 pathway
- NABA MATRISOME ASSOCIATED
- mTOR signaling pathway
- import across plasma membrane
- lipid modification
- regulation of small GTPase mediated signal transduc
- regulation of organic acid transport
- Unfolded Protein Response (UPR)
- energy homeostasis
